

## TXU Energy

**Project name:** TXU Energy Corporate Relocation

**Completion Date:** 2008

**Location:** Sierra Building

**Address:** 6555 Sierra Drive

Las Colinas, Texas

**Company:** Energy Future Holdings

### **Project overview**

TXU Energy is a market-leading competitive retailer that provides electricity and related services to more than 2 million Texas customers. TXU Energy is a subsidiary of Energy Future Holdings Corp.

At the beginning of 2008, TXU Energy relocated to 247,000 square feet of office space located at 6555 Sierra Drive in Las Colinas. Approximately 400 TXU Energy employees occupy the 3-floors at the new Corporate Headquarters.

### **ABLE solution**

ABLE Communications, Inc. was chosen to provide the structured cabling system for the new TXU Energy corporate headquarters. ABLe installed a Systimax solution utilizing category 5-E for the copper connectivity and multimode 50um armored cable for the fiber connectivity.

The new building was a LEED's project and ABLe worked closely with the general contractor Scott and Reid and the architect The Lauck Group. This project was a state of the art installation utilizing an open ceiling environment. Aesthetics was a main priority with the open ceiling and the high profile clientele that it services.

The building consists of 3-floors with 2 network closets serving each floor and ABLe installed an open wire basket system to support the cabling.

The scope of work included:

- Provide, install, and test conventional fiber cable
- Provide, install, and test multi-pair backbone copper
- Provide, install, and test Ethernet cable
- Provide and construct telecom cross-connect closets

\*\*ABLE Communications received the Gold Star Supplier of the year award from TXU in 2008.
